The two nations shared many economic similarities yet Taiwan moved from clientelism to state corporatism while in the Philippines clientelism remains deeply entrenched. Kuo's case studies in the textile, plywood, and electronics industries support these general arguments. He finds that clientelism invariably leads to economic problems while a laissez-faire approach is unpredictable. The best formula for industrial success in a developing nation is close cooperation between business and government.

The Status and an Evaluation of the Electronics Industry in Taiwan Gee San, 1990 The Status and an Evaluation of the Electronics Industry in Taiwan Gee San, 1990 **Taiwan's Impact on**

China Steve Tsang, 2017-01-24 This book is about the basis and scope of impact that Taiwan, a democracy with a population of around 23 million, has on China, the most powerful remaining Leninist state which claims sovereignty over Taiwan and has a population of over 1.3 billion. It examines how Taiwan has helped China in its economic transformation but argues that the former exercises greatest influence through its soft power. The expert and timely contributions in this book demonstrate how

Taiwan exerts real influence in China through admiration of its popular culture be it in music or literature as well as its reach into politics and economics As mainland Chinese visit Taiwan they are most impressed with civility in everyday living based on a modernized version of the traditional Chinese culture However discussions in the book also reveal the limits of Taiwan's impact as the Chinese government tightly controls the narrative about Taiwan and does not tolerate any Taiwanese posing a threat to its monopoly of power

volume represents the first substantive study of emerging multinationals MNEs from Asian economies drawing on the unique experiences of South Korea and Taiwan Combining an econometric investigation with detailed case studies of leading Korean and Taiwanese electronics companies it aims to demystify the nature and theoretical implications of these dynamic economic regions The author argues that many of these new multinationals do not possess the characteristics typically ascribed to MNEs such as technological leadership strong marketing positions or advanced managerial capabilities This is highlighted by documentation of recent developments in outward investment from Korea and Taiwan at both micro and macro level The implications of the recent Asian crisis for the internationalization of Korean and Taiwanese firms are also explored
