R.M. Goodwin,1970      Elementary economics from the higher standpoint ,      Elementary Economics from the Higher Standpoint [by] R. M. Goodwin ,1970      **Cambridge Economics in the Post-Keynesian Era** Ashwani Saith,2022-11-11

This book chronicles the rise and especially the demise of diverse revolutionary heterodox traditions in Cambridge theoretical and applied economics investigating both the impact of internal pressures within the faculty as also the power of external ideological and political forces unleashed by the global dominance of neoliberalism Using fresh archival materials personal interviews and recollections this meticulously researched narrative constructs the untold story of the eclipse of these heterodox and post Keynesian intellectual traditions rooted and nurtured in Cambridge since the 1920s and the rise to power of orthodox mainstream economics Also expunged in this neoclassical counter revolution were the structural and radical policy oriented macro economic modelling teams of the iconic Department of Applied Economics along with the atrophy of sociology development and economic history from teaching and research in the self purifying faculty This book will be of particular interest to researchers in the history of economic thought sociology of knowledge political economy especially those engaged in heterodox and post Keynesian economics and to everyone wishing to make economics fit for purpose again for negotiating the multiple economic social and environmental crises rampant at national and global levels

and random wages Thorstein Veblen worker job turnover and more      On Political Economists and Political Economy Professor Geoffrey Harcourt, 2013-10-08 Included in this volume are papers which are recognized as some of the foundations of post Keynesian Economics analysing problems set in historical time and starting from real world observations The book reflects Geoff Harcourt's contribution to economic debate over more than three decades It also includes intellectual biographies of some of the most prominent and leading unorthodox economists such as Kenneth Boulding Eric Russell and Lorie Tarshis      *The Dynamics Of A Capitalist Economy* Richard M. Goodwin, Lionel F. Punzo, 2019-09-05 In this book Professor Goodwin eschewing fine scale minutiae or classical mechanics has addressed the big picture His work deals with the great issues of the class struggle a la Karl Marx predator prey dramas of the Lotka Volterra type von Neumann's magisterial model of autonomous growth Harroddian and Sraffian developments of Keynesian systems in their input output aspects or accelerator multiplier aspects Professor Lionello Punzo of a postwar generation provides additional chapters of multi sector dynamics working from and going beyond the aggregate models of Harrod Domar and Solow      *Nonlinear and Multisectoral Macrodynamics* Kumaraswamy Velupillai, 1990-06-18 A collection of essays concerned with nonlinear and multisectoral macrodynamics written in honour of Richard Goodwin which includes discussion of Goodwin's contribution and ideas in comparison with other theories      **Transformational Growth and Effective Demand** Edward J. Nell, 1991-12-01 A collection of essays which develop Professor Nell's economic theory of transformational growth The author's previous titles include *Free Market Conservatism A Critique of Theory and Practice* and *Beyond the Steady State A Revival of Growth Theory*      *Declining Profitability and the Evolution of the US Economy* Ascension Mejorado, Manuel Roman, 2023-09-01 The 1970s were a pivotal decade for the US economy deindustrialization broke the power of the labor unions and made possible the redistribution of income in favor of corporate profits globalization and offshore investments opened alternatives to domestic nonfinancial capital accumulation domestic productivity growth declined and labor saving technology empowered superstar corporations to rapidly gain market share This book argues that the persistent fall in profitability leading to the stagflation crisis was a direct result of the transition from the Fordist phase of capital accumulation based on large scale manufacturing to the neoliberal phase and the rising power of finance Neoliberalism restored the power of rentiers but not the profit rates of nonfinancial corporations Falling accumulation rates weakened the growth capacity of nonfinancial corporate firms and secular stagnation became the norm Neo Keynesian economists Larry Summers and Paul Krugman explained the persistence of secular stagnation with arguments borrowed from Alvin Hansen in the 1930s such as the declining birth rate or the falling relative prices of investment goods hence a shortfall of demand In the Classical paradigm profitability drives capital accumulation and falling profitability slows down growth As the accumulation rate declined and the capacity growth diminished breakdowns in supply links due to the COVID 19 pandemic prevented large infusions of purchasing power to find matching levels of supply hence the stagflation crisis returned The book will be a great asset to

researchers and scholars interested in the development of Classical Political Economy concerning issues related to inflation stagnation growing inequality and the next phase of neoliberalism

*Political Economy and Christian Theology Since the Enlightenment* A. Waterman, 2004-11-30 Political economy and Christian theology coexisted happily in the intellectual world of the eighteenth century During the nineteenth century they came to be seen as incompatible even mutually hostile In the twentieth century they went their separate ways and are no longer on speaking terms These fourteen essays by Anthony Waterman serve as snapshots of the history of this estrangement and illustrate the gradual replacement of the discourse of theology by that of economics as the rational framework of political debate Others have recently shown that both political economy and Christian theology are important though somewhat neglected elements in modern intellectual history This book is the first to combine these two lines of inquiry

*Growth, Profits and Property* Edward J. Nell, 1979 This collection of essays is designed to illustrate the variety complexity and power of non neoclassical economic thinking The essays define the fundamental questions differently employ different analytical tools and arrive at different conclusions The two strands of non neoclassical thinking that occupy most of the book are the neo Keynesian and the neo Marxian The bulk of the book is composed of essays on microeconomics macroeconomics trade comparative systems and welfare with an unusual section on property rights and social hierarchy

*History and Political Economy* Tony Aspromourgos, John Lodewijks, 2004-08-02 Impressive and authoritative this essential book brings together a collection of essays in honour of Peter Groenewegen one of the most distinguished historians of economic thought of a generation His work on a wide range of economic theorists such as Adam Smith Francois Quesnay and Alfred Marshall approaches a level of near insuperability

various countries and covers equilibrium distribution impulses of change etc Diagrams and statistical tables *Beyond the Steady State* Joseph Halevi, 1992-06-18 The essays in this book seek to identify the mechanisms that determine the extent and nature of economic growth The subject is addressed under four headings demand determined growth technical change traverse and growth cycles **Governing Turbulence, Risk and Opportunities in the Complexity Age** Guglielmo Chiodi, Antonio Bazilio Floriani Neto, Enrique Caceres Niet, 2018-11-23 The book is composed of several articles that explore complexity in its most varied aspects The solution of contemporary problems whatever they may be requires a multifaceted vision far beyond the reductionist perspective The study of complex systems however does not have the capacity to offer ready answers to the challenges of humanity On the contrary it points to the increase in uncertainty the need to control variables and uncertainty This does not mean therefore that we should simply ignore the social economic and political phenomena that are all around us What this book demonstrates is the importance of knowledge being disseminated and it is imperative that different sciences exchange ideas theories and breakthroughs
