Centennial Essays on Joseph Conrad's Chance ,2015-11-24 When Joseph Conrad s novel Chance appeared in serial form in the New York Herald in 1912 and in book form in 1914 it established the author s financial security for the first time Following years of struggle to reach a wide audience for his fiction Conrad benefitted from the American marketing of this novel for the women readers of romance Aggressive advertising promoted the writer s new focus on a female protagonist and

Conrad's division of the story's location between land and sea. The novel proved popular and lucrative. Yet in spite of its economic success, *Chance* remains one of Conrad's less well-known narratives. This fresh new collection of essays from both young and established scholars opens up a lively critical debate taking *Chance* beyond the status of best-selling romance. In a striking re-evaluation of the novel, these writers examine *Chance*'s innovative narrative strategies, its up-to-the-minute commentary on female politics, contemporary ethics, as well as its antecedents in classical debate and the significance of Conrad's last use of his seaman narrator Marlow.

Standard Deviations Leland Monk, 1994-03-01. Analyzing works by George Eliot, Joseph Conrad, and James Joyce, the author offers a new approach to narrative theory by showing how successive generations of novelists have used ever more powerful concepts of chance, even though he argues chance is precisely what narrative cannot represent, since when it tries to do so it slips into the fated. He also relates the novelistic treatment of chance to important historical currents in the philosophical and scientific understanding of chance and provides a theoretical framework for analyzing the representation of chance in any narrative. The author asks three central questions: Why did British novelists become intensely interested in chance in the late nineteenth century? Why and how did they thematize it in their fiction? How did the novelistic treatment of chance contribute to innovations in narrative form?

Handbook of Polish, Czech, and Slovak Holocaust Fiction Elisa-Maria Hiemer, Jiří Holý, Agata Firlej, Hana Nichtburgerová, 2021-06-21. The Handbook of Polish, Czech, and Slovak Holocaust Fiction aims to increase the visibility and show the versatility of works from East Central European countries. It is the first encyclopedic work to bridge the gap between the literary production of countries that are considered to be main sites of the Holocaust and their recognition in international academic and public discourse. It contains over 100 entries offering not only facts about the content and motifs but also pointing out the characteristic fictional features of each work and its meaning for academic discourse and wider reception in the country of origin and abroad. The publication will appeal to the academic and broader public interested in the representation of the Holocaust, anti-Semitism, and World War II in literature and the arts. Besides prose, it also considers poetry and theatrical plays from 1943 through 2018. An introduction to the historical events and cultural developments in Poland, Czechoslovakia, Czech and Slovak Republic, and their impact on the artistic output helps to contextualise the motif changes and fictional strategies that authors have been applying for decades. The publication is the result of long-term scholarly cooperation of specialists from four countries and several dozen academic centres.

Animal Cognition Thomas R. Zentall, 2013-12-02 Prepared as a tribute to Donald A Riley the essays that

appear here are representative of a research area that has loosely been classified as animal cognition a categorization that reflects a functionalist philosophy that was prevalent in Riley s laboratory and that many of his students absorbed According to this philosophy it is acceptable to hypothesize that an animal might engage in complex processing of information as long as one can operationalize evidence for such a process and the hypothesis can be presented in the context of testable predictions that can differentiate it from other mechanisms The contributions to this volume represent the three most important areas of research in animal cognition stimulus representation memory processes and perceptual processes although current research has considerably blurred these distinctions The Writer's Bulletin and Literary Reporter ,1914
