Elementary Instructions For Students Of Sculpture:

Elementary Instructions for Students of Sculpture Francesco Carradori, 2002 Carradori's book of instructions is vital to understanding the art and craft of sculpting as they were practiced before the twentieth century since little substantial material exists that demonstrates in an informed didactic manner the various tools and techniques used by ancient sculptors Carradori's work is the most comprehensive and instructive it includes thirteen articles that explain how to restore marble sculpture model clay work with stucco and wax cast and finish bronze and how to carve and enlarge models into marble and stone as well as seventeen tables that illustrate the arrangement methods and tools used in each of these processes The book also includes the complete Italian text Jacket **Francesco Corradori (1747-1824)** Matti Kalevi Auvinen, 2002

Casting the Parthenon Sculptures from the Eighteenth Century to the Digital Age Emma M. Payne, 2021-04-08 Through the 19th century as archaeology started to emerge as a systematic discipline plaster casting became a widely adopted technique newly applied by archaeologists to document and transmit discoveries from their expeditions The Parthenon sculptures were some of the first to be cast In the late 18th century and the first years of the 19th century the French artist Fauvel and Lord Elgin's men conducted campaigns on the Athenian Acropolis Both created casts of parts of the Parthenon sculptures that they did not remove and these were sent back to France and Britain where they were esteemed and displayed alongside other original sections Henceforth casting was established as an essential archaeological tool and grew exponentially over the course of the century Such casts are now not only fascinating historical objects but may also be considered time capsules capturing the details of important ancient works when they were first moulded in centuries past This book examines the role of 19th century casts as an archaeological resource and explores how their materiality and spread impacted the reception of the Parthenon sculptures and other Greek and Roman works Investigation of their historical context is combined with analysis of new digital models of the Parthenon sculptures and their casts Sensitive 3D imaging techniques allow investigation of the surface markings of the objects in exceptionally fine detail and enable quantitative comparative studies comparing the originals and the casts The 19th century casts are found to be even more accurate but also complex than anticipated through careful study of their multiple layers we can retrieve surface information now lost from the originals through weathering and vandalism *Supports in Roman Marble Sculpture* Anna Anguissola, 2018-02-15 The first study of a crucial aspect of Roman stone sculpture exploring the functions and aesthetics of non figural supports

diverse as originality and artistic production the association between the sculptural surface flesh and anatomy the relationship between painting and sculpture and the role of public museums Beholders discussions also shaped the legacy of important sculptural theories They helped usher in their modern definitions and created the lenses through which we experience and interpret works of art establishing modern attitudes not just towards sculpture but towards cultural patrimony in general *History of Restoration of Ancient Stone Sculptures* Janet Burnett Grossman, Jerry Podany, Marion True, 2003-12-25 The nineteen papers in this volume stem from a symposium that brought together academics archaeologists museum curators conservators and a practicing marble sculptor to discuss varying approaches to restoration of ancient stone sculpture Contributors and their subjects include Marion True and Jerry Podany on changing approaches to conservation Seymour Howard on restoration and the antique model Nancy H Ramage s case study on the relationship between a restorer Vincenzo Pacetti and his patron Luciano Bonaparte Mette Moltesen on de restoring and re restoring in the Ny Carlsberg Glyptotek Miranda Marvin on the Ludovisi collection and Andreas Scholl on the history of restoration of ancient sculptures in the Altes Museum in Berlin The book also features contributions by Elizabeth Bartman Brigitte Bourgeois Jane Fejfer Angela Gallottini Sascha Kansteiner Giovanna Martellotti Orietta Rossi Pinelli Peter Rockwell Edmund Southworth Samantha Sportun and Markus Trunk Charles Rhyne summarizes the themes approaches issues and questions raised by the symposium

interest in the histories of alternative exhibitions single artwork solo artist artist mounted entrepreneurial privately funded ephemeral etc with the notable exception of those publications that deal with situations involving major artists or those who would become so for example J L David s exhibition of Intervention of the Sabine Women 1799 and The First Impressionist Exhibition of 1874 despite the fact that these sorts of exhibitions and critical scholarship about them have become commonplace and no less important in the contemporary art world The present volume uses and contextualizes eleven case studies to advance some overarching themes and commonalities among alternative exhibitions in the long modern period from the late eighteenth to the late twentieth centuries and beyond These include the issue of control in the interrelation and elision of the roles of artist and curator and the relationship of such alternative exhibitions to the dominant modes structures of display and cultural ideology
